OT200 Compact Ceiling Hoist

The award winning OT200 Compact Ceiling Hoist is the smallest professional-use patient hoist on the market.

With a unique gravity powered system to recharge whenever in use, the OT200 can substantially save service costs and can remain charged for more than 150 lifts. Also featuring an emergency lowering function which does not require tools, the award winning OT200 is a cost effective, flexible solution that can be installed in virtually any setting.

Unique Features

- Compact cassette with no-lights at night
- Gravity powered charging
- No tools emergency lowering
- Low cost of ownership
- Removable padded Spreader Bar
- Retro installations to existing tracks
