

TR 2000 Model 2021

Hydraulic Shower Trolleys

Hygiene Equipment
Designed for People

Multi-tasking shower trolley with endless application possibilities

The TR 2000 hydraulic foot operated shower trolley (max patient weight 200 kg) is unique with its side mounted column allowing the trolley stretcher to overlap the bed further for a safe and easy patient transfer.

The trolley drains at both ends allowing the person to be positioned in either direction, an invaluable feature for the caregiver.

The TR 2000 comes in four sizes: three models with width 640 mm and lengths 1600 mm, 1900 mm and 2100 mm and one wider model 1950 mm x 695 mm if there is a need for an increased patient working area.

The TR 2000 height adjustable Shower Trolley is a great solution to prevent back injuries and to minimize static load and offers a safe and ergonomic working environment for the caregiver.
